### **DETAILED ACTION**

This action is in response to the amendment filed 6 November 2007. Claims 5, 8, 9, 13, and 26 were previously cancelled. Claims 24, 25, 27-29, and 33 are cancelled by this amendment. Claims 1-4, 7, 10-12, 14-23, and 30-32 are currently pending.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1 and 30 have been considered but are moot in view of the new ground(s) of rejection. Although the new limitation introduced is not taught by Carroll or Belcher, alone or in combination, nor by any other prior art discovered in the search process, the examiner notes that the claimed limitation is also not taught by applicant's disclosure. There is no mention in the specification or figures of "authorization", nor any variation thereof (i.e. "authorized" "authorizing" etc.). As such, a new grounds of rejection under 35 USC §112 is proper.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4, 7, 10-12, 14-23, and 30-32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to

reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Independent claim 1 as amended specifies the new limitation "wherein the security processor is configured to send a replacement unique identifier to the transponder from a transponder writer, the transponder replacing the identifier in the transponder memory with the replacement identifier, **following each authorization**" (emphasis added). There is no indication in the specification that any "authorization" ever occurs. As discussed above, there is no mention in the specification or figures of "authorization" or any variation thereof.

Independent claim 30 contains similar language and is rejected for the same reason. Similarly, dependent claims 2-4, 7, 10-12, 14-23, 31, and 32 inherit this language from their parent claims, and are thus also rejected.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
